lling 18a-c. The market opened with a very good demand, and diling 188—C.

The market opened with a very good demand, and allbough factors asked higher prices, predicated on the advance reported at Liverpool, and the anticipation that light receipts and the discouraging prospects will cause a further improvement, yet the movement continued active throughout the day, with the result noted above. There was considerable diversity of opinion with regard to quotations, parties who had operated free y differing ½a½c, some quoting Low Middling at 16½al6½c, others at 16½al6½c, and others at 16½al6½c. This conflict of opinion is partly owing to difference in classification, but may be chiefly ascribed to the irregularity of the market, and its ruling late in the day at higher rates than at the commencement. The upward tendency was increased by the competition among buyers and the moderate supply, which more than counterbalanced the disadvantage of a decline of about one per cent. In foreign exchange.
